Arsal Iftikhar
Web Developer

I have been involved in the development field for over 5 years, gaining substantial experience. During this time, I have focused on Magento (2.0) standards and specialized in custom theme development as well as paid theme customization. I possess the ability to manage the entire development process, encompassing UI designing, development, and thorough testing.

Experience

2017 - 2019
IT Solutions Multan Pakistan
Junior Web Developer

During my tenure as a frontend developer in my company, I was responsible for converting design concepts into functional web pages, ensuring seamless user experiences. Implementing visually appealing and intuitive user interfaces in close collaboration with the design team writing clean and organized code using **HTML**, **CSS**, and **JavaScript,** Implementing responsive layouts and optimizing performance for various devices troubleshooting and debugging frontend issues to ensure smooth functionality Working with backend developers to integrate frontend and backend components Participating in code reviews and providing constructive feedback for improving code quality.

2019 - 2021
Web Developer (FREELANCER)
Full Stack Web Developer

In addition to my professional experience as a senior front-end developer in my current company, I have also worked as a freelancer in front-end web development for a considerable period of time. During this period, I have successfully undertaken and completed numerous projects, where I have played a pivotal role in designing and converting website layouts into visually appealing and highly functional interfaces. My expertise and skills in front-end development have enabled me to deliver exceptional results and meet the expectations of my clients. This diverse experience has further strengthened my abilities as a front-end developer and has allowed me to contribute effectively to various projects.

2021 - PRESENT
Magemen Lahore Pakistan
Senior Software Engineer (Shopify & Magento 2)

I am currently working as a professional Magento 2 front-end developer at Magemen, where I have gained valuable experience and expertise in website design and development. Currently, I hold the position of a senior front-end developer in my company, where I have successfully completed numerous projects focusing on Magento 2 front-end development. With over two years of experience in this field, I have gained extensive knowledge and expertise in creating visually appealing and user-friendly websites. Moreover, I have recently taken on the role of a team lead, where I guide and supervise a group of developers, ensuring seamless collaboration and the delivery of high-quality projects. My passion for front-end development and my leadership skills drive me to excel in my role and contribute effectively to my company's success.
